

Ferns

Adiantum aleuticum - Maidenhair Fern

Height: 60 cm **Hardiness:** Zone 3b
Exposure: Full-Partial shade **Soil:** Average-Moist
Native Range: Canada: BC and AB
US: AK, AZ, CA, CO, ID, MT, NV, OR, UT, WA and WY

Hardy, yet delicate looking deciduous fern with liquorice black stems. Grow under native vine maples, near ponds, woodland gardens or in containers. Grows best in moist areas but will tolerate drier shady sites once well established. Mixed with yarrow, it is used as a hair rinse that adds body and lustre.

Price:
9 cm pot \$4.75 **15 cm pot** \$10.00

Athyrium filix-femina - Lady Fern

Height: 1.5 m **Hardiness:** Zone 3b
Exposure: Full -Partial shade **Soil:** Moist-Wet
Native Range: Canada: BC, NT, AB, SK, MB, YT, ON and QC
US: West and mid-western states.

Variety *cyclosum*. A deciduous vase-shaped fern with erect fronds. One of the few native ferns that spreads readily on its own. Its lush green fronds make a lovely background for shady gardens, near wetlands or as a summer screen along shaded fence lines.

Price:
9 cm pot 4.50

Blechnum spicant - Deer Fern

Height: 80 cm **Hardiness:** Zone 5b
Exposure: Full - Partial Shade **Soil:** Moist-Wet
Native Range: Canada: BC
US: AK, CA, ID, OR and WA

An elegant fern which sends upright fruiting fronds from a lower (30 cm) horizontal evergreen base. Deer fern grow well in poor, water-logged soils that dry slightly in summer. Rarely troubled by browsing deer, it makes a very attractive accent on its own under trees, along the north side of homes, edging shady paths or in containers that are kept moist.

Price:
9 cm pot \$4.75

Ferns

Gymnocarpium dryopteris - Oak Fern

Height: 25 cm **Hardiness:** Zone 3b

Exposure: Shade **Soil:** Moist

Native Range: Canada: All

US: Northern states plus AZ, CO, NM and UT

A small deciduous creeping fern that acts like a groundcover, forming dainty masses around taller woodland perennials and ferns. This precious fern grows well in moist woodland sites or on moist shaded rocky slopes and ledges.

Price:

9 cm pot \$4.50

Matteuccia struthiopteris - Ostrich Fern

Height: 1-1.7 m **Hardiness:** Zone

Exposure: Shade **Soil:** Moist

Native Range: Canada: All

US: Eastern states.

Native fern along the Fraser River lowlands in Chilliwack. This is the true fiddlehead fern, grown for edible markets. It has a very attractive vase habitat with broad fronds spreading gracefully outwards. This fern spreads by an underground stolon forming impressive stands under deciduous trees and along wet areas.

Price:

15 cm pot \$10.00

Polypodium glycyrrhiza - Licorice Fern

Height: 20 cm **Hardiness:** Zone 7a

Exposure: Full-Partial shade **Soil:** Moist

Native Range: Canada: BC US: AK, AZ, CA, ID, OR and WA

An evergreen fern that loves moist mossy ground with woody debris, or abundant bark mulch mixed in. This fern remains green during abundant moisture periods from fall to early summer and will become dormant during hot, dry spells in summer, then hardily rebounds with the fall rains. The creeping rhizome has a licorice flavour and contains a compound 3000 times sweeter than sucrose.

Price:

9 cm pot \$4.75

Ferns

Polystichum munitum - Sword Fern

Height: To 1.5m **Hardiness:** Zone 5a
Exposure: Partial shade- sun **Soil:** Dry - Moist
Native Range: Canada: BC
US: AK, CA, ID, MT, OR, PA, SD and WA

Popular large, evergreen fern with graceful arching fronds that reach up to 1.5 meter in spread. Very tough fern for any shade or woodland garden and is useful as a background for shady beds. Some gardeners like to remove the old fronds in early spring, but when the old evergreen leaves are left they form a mulch that is able to compete with buttercup. The leaves were used for lining boxes, baskets, fruit drying racks and as a stuffing material in bedding. Rarely troubled by browsing deer.

Price:

9 cm pot	\$4.75	15 cm pot	\$10.00
